RCRA CLOSURE AND INTERIM STATUS ISSUES

Attn: C. C. Jierree

A number of sites at the Rocky Flats Plant are undergoing RCRA Interim Status Closure. In recent discussions with the Colorado Department of Health (CDH) the issue of interim status and which units at the Rocky Flats Plant have interim status has come up. The guidance given to the Rocky Flats Plant on July 25, 1988 by CDH was that all units presented in the November 1986 RCRA Part A and Part B Permit Application have interim status. Any of these units that are no longer needed should be deleted from the RCRA Part B Permit Application, remain in the RCRA Part A Permit Application, and have an interim status RCRA Closure Plan submitted. Rocky Flats has proceeded as per the above guidance from CDH.

A number of sites at the Rocky Flats Plant are undergoing RCRA Interim Status Closure, but were not included in the November 1986 RCRA Part A and Part B Permit Application. These sites are the Solar Evaporation Ponds, Present Landfill, Original Process Waste Lines, Building 443 No. 4 Fuel Oil Tank, Container Storage Areas, and the West Spray Field. RCRA Interim Status Closure Plans were submitted to CDH and EPA in November 1986 for the above units. The above actions in 1986 were conducted as per guidance from CDH and EPA in 1986. On July 25, 1988 CDH stated that it was felt that these units from 1986 are "a special case" and are in compliance due to the submittal of interim status closure plans in 1986.

Based on the above discussions it is felt that the Rocky Flats Plant is in compliance with interim status and closure regulations. Unfortunately written correspondence on these issues has not been received. We therefore recommend sending the attached letter to CDH and EPA to confirm our compliance on the above issues.

If you have questions, please contact Frank Blaha of my staff on extension 5537.
